Author Index of Vol. 69

Aicardi G, see Galletti C, et al. 279
Aldenhoff JB, see Bode-Greuel KM, et al. 213
Allum JHJ, see Keshner EA, et al. 77
Amri M, see Car A 175
André-Deshays C, Berthoz A, Revel M: Eye-head coupling in humans. I. Simultaneous recording of isolated motor units in dorsal neck muscles and horizontal eye movements 399
Ashby P, Stålberg E, Winkler T, Hunter JP: Further observations on the depression of group Ia facilitation of motoneurons by vibration in man 1
Audinat E, Condé F, Crépel F: Cortico-cortical connections of the limbic cortex of the rat 439
Azeredo FAM de, see Guedes RCA, et al. 113
Bachelard HS, see Cox DWG 368
Baker JF, Perlmutter SI, Peterson BW, Rude SA, Robinson FR: Simultaneous opposing adaptive changes in cat vestibulo-ocular reflex direction for two body orientations . . 220
Battaglini PP, see Galletti C, et al. 279
Batueva IV: Efficiency of electrical transmission in reticulomotoneuronal synapses of lamprey spinal cord . . . 131
Bealer SL, Busija DW: Redistribution of cardiac output after hypothalamic lesions and hemorrhage 107
Bender DB, Butter CM: Comparison of the effects of superior colliculus and pulvinar lesions on visual search and tachistoscopic pattern discrimination in monkeys . . . 140
Benevento LA, see Lysakowski A, et al. 651
Berthoz A, see André-Deshays C, et al. 399
Berthoz A, see Melvill Jones G, et al. 531
Bianchetti M, see Hummelsheim H, et al. 289
Bindman LJ, Meyer T, Prince CA: Comparison of the electrical properties of neocortical neurones in slices in vitro and in the anaesthetized rat 489
Björklund A, see Brundin P, et al. 183
Björklund H, see Eriksdotter-Nilsson M, et al. 155
Bode-Greuel KM, Singer W, Aldenhoff JB: A current source density analysis of field potentials evoked in slices of visual cortex 213
Brauer K, Schober W, Winkelmann E, Garey LJ: Topographic differences in retinal axons in the dorsal lateral geniculate nucleus of the rat: a quantitative reexamination using anterograde transport of horseradish peroxidase . . . 481
Bromberg MB, Pamel G, Stephenson BS, Young AB, Penney JB: Evidence for reactive synaptogenesis in the ventrolateral thalamus and red nucleus of the rat: changes in high affinity glutamate uptake and numbers of corticofugal fiber terminals 53
Brundin P, Strecker RE, Londos E, Björklund A: Dopamine neurons grafted unilaterally to the nucleus accumbens affect drug-induced circling and locomotion 183
Buchwald JS, see Shipley C, et al. 431
Burke RE, see Fleshman JW, et al. 449
Buser P, see Montaron MF 559
Busija DW, see Bealer SL 107
Butter CM, see Bender DB 140
Car A, Amri M: Activity of neurons located in the region of the hypoglossal motor nucleus during swallowing in sheep 175
Carney T, see Xue JT, et al. 497
Carterette EC, see Shipley C, et al. 431
Cassel JC, see Dalrymple-Alford JC, et al. 545
Castro AJ, Tønder N, Sunde NAa, Zimmer J: Fetal neocortical transplants grafted to the cerebral cortex of newborn rats receive afferents from the basal forebrain, locus coeruleus and midline raphe 613
Chung SK, Pfaff, DW, Cohen RS: Estrogen-induced alterations in synaptic morphology in the midbrain central gray 522
Clarke RJ, see Guedes RCA, et al. 113
Cohen RS, see Chung SK, et al. 522
Condé F, see Audinat E, et al. 439
Corner MA, see Habets AMMC, et al. 43
Cox DWG, Bachelard HS: Partial attenuation of dentate granule cell evoked activity by the alternative substrates, lactate and pyruvate: evidence for a postsynaptic action . . 368
Crépel F, see Audinat E, et al. 439
Dahl D, see Eriksdotter-Nilsson M, et al. 155
Dalrymple-Alford JC, Kelche C, Cassel JC, Toniolo G, Pallage V, Will BE: Behavioral deficits after intrahippocampal fetal septal grafts in rats with selective fimbria-fornix lesions 545
DeFelipe J, see Fonseca M, et al. 387
Distler C, see Hoffmann K-P, et al. 635
Dostrovsky JO, see Molinari HH 119
Ellendorff F, see Pittius CW, et al. 208
Erickson RG, see Hoffmann K-P, et al. 635
Eriksdotter-Nilsson M, Björklund H, Dahl D, Olson L, Ingvar M: Sustained seizures cause circumscribed cerebral changes in glial fibrillary acidic protein, neurofilament and laminin immunofluorescence 155
Fairén A, see Fonseca M, et al. 387
Feldman S, see Saphier D 60
Fleshman JW, Rudomin P, Burke RE: Supraspinal control of a short-latency cutaneous pathway to hindlimb motoneurons 449
Fonseca M, DeFelipe J, Fairén A: Local connections in transplanted and normal cerebral cortex of rats 387
Forsythe ID, Nelson PG: The effect of intracellular tetraethylammonium ions on the reversal potential of monosynaptic EPSPs and excitatory amino acids in cultured spinal cord neurones 272
Freedman W, see McElligott JG 509
Freeman RD, see Xue JT, et al. 497
Galletti C, Battaglini PP, Aicardi G: 'Real-motion' cells in visual area V2 of behaving macaque monkeys 279
Garey LJ, see Brauer K, et al. 481
Georgopoulos AP, Massey JT: Cognitive spatial-motor processes. 2. Information transmitted by the direction of two-dimensional arm movements and by neuronal populations in primate motor cortex and area 5 315
Gioanni H: Stabilizing gaze reflexes in the pigeon (*Columba livia*). I. Horizontal and vertical optokinetic eye (OKN) and head (OCR) reflexes 567
Gioanni H: Stabilizing gaze reflexes in the pigeon (*Columba livia*). II. Vestibulo-ocular (VOR) and vestibulo-collic (closed-loop VCR) reflexes 583
Godement P, see Métin C, et al. 594
Goto S, Matsukado Y, Uemura S, Mihara Y, Inoue N, Ikeda J, Miyamoto E: A comparative immunohistochemical study of calcineurin and S-100 protein in mammalian and avian brains 645
Gray CM, Skinner JE: Centrifugal regulation of neuronal activity in the olfactory bulb of the waking rabbit as revealed by reversible cryogenic blockade 378
Greenfield SA, see Nedergaard S, et al. 444
Guedes RCA, Azeredo FAM de, Hicks TP, Clarke RJ, Tashiro T: Opioid mechanisms involved in the slow potential change and neuronal refractoriness during cortical spreading depression 113

Guitton D, see Melvill Jones G, et al. 531
Habets AMMC, Van Dongen, AMJ, Van Huizen F, Corner MA: Spontaneous neuronal firing patterns in fetal rat cortical networks during development in vitro: a quantitative analysis 43
Haenny PE, Schiller PH: State dependent activity in monkey visual cortex. I. Single cell activity in V1 and V4 on visual tasks 225
Haenny PE, Maunsell JHR, Schiller PH: State dependent activity in monkey visual cortex. II. Retinal and extraretinal factors in V4 245
Hagihara K, Tsumoto T, Sato H, Hata Y: Actions of excitatory amino acid antagonists on geniculo-cortical transmission in the cat's visual cortex 407
Hari R, see Kaukoranta E, et al. 19
Hasegawa Y, see Nakagawa S, et al. 373
Hata Y, see Hagihara K, et al. 407
Hicks TP, see Guedes RCA, et al. 113
Höllt V, see Pittius CW, et al. 208
Hoffmann K-P, Distler C, Erickson RG, Mader W: Physiological and anatomical identification of the nucleus of the optic tract and dorsal terminal nucleus of the accessory optic tract in monkeys 635
Holstein GR, see Pasik P, et al. 662
Hopkins C, see Nedergaard S, et al. 444
Hummelsheim H, Bianchetti M, Wiesendanger M, Wiesendanger R: Sensory inputs to the agranular motor fields: a comparison between precentral, supplementary-motor and premotor areas in the monkey 289
Hunter JP, see Ashby P, et al. 1
Iggo A, see Mokha SS 93
Ikeda J, see Goto S, et al. 645
Imbert M, see Métin C, et al. 594
Ingvar M, see Eriksdotter-Nilsson M, et al. 155
Inoue N, see Goto S, et al. 645
Jiménez I, Rudomin P, Solodkin M: Mechanisms involved in the depolarization of cutaneous afferents produced by segmental and descending inputs in the cat spinal cord . . . 195
Jinnai K, Nambu A, Yoshida S: Thalamic afferents to layer I of anterior sigmoid cortex originating from the VA-VL neurons with entopenduncular input 67
Jones MW, Kilpatrick IC, Phillipson OT: Dopamine function in the prefrontal cortex of the rat is sensitive to a reduction of tonic GABA-mediated inhibition in the thalamic mediodorsal nucleus 623
Kaukoranta E, Hari R, Lounasmaa OV: Responses of the human auditory cortex to vowel onset after fricative consonants 19
Kelche C, see Dalrymple-Alford JC, et al. 545
Kenyon RV, Kerschmann R, Silbergleit R: Streptomycin in the chick embryo: post-hatching vestibular behavior and morphology 260
Kerkerian L, Nieoullon A: Supersensitivity of presynaptic receptors involved in the dopaminergic control of striatal high affinity glutamate uptake after 6-hydroxydopamine lesion of nigrostriatal dopaminergic neurons 424
Kerschmann R, see Kenyon RV, et al. 260
Keshner EA, Allum JHJ, Pfaltz CR: Postural coactivation and adaptation in the sway stabilizing responses of normals and patients with bilateral vestibular deficit 77
Kilpatrick IC, see Jones MW, et al. 623
Kubozono T, see Nakagawa S, et al. 373
Kurata K, Wise SP: Premotor cortex of rhesus monkeys: set-related activity during two conditional motor tasks 327
Lannou J, see Le Taillanter M 417
Le Taillanter M, Lannou J: Responses of nucleus reticularis tegmenti pontis neurons to vestibular stimulation in the rat 417
Licht G, Meredith M: Convergence of main and accessory olfactory pathways onto single neurons in the hamster amygdala 7
Londos E, see Brundin P, et al. 183
Lounasmaa OV, see Kaukoranta E, et al. 19
Lysakowski A, Standage GP, Benevento LA: An investigation of collateral projections of the dorsal lateral geniculate nucleus and other subcortical structures to cortical areas V1 and V4 in the macaque monkey: a double label retrograde tracer study 651
Mader W, see Hoffmann K-P, et al. 635
Mann SE, Thau R, Schiller PH: Conditional task-related responses in monkey dorsomedial frontal cortex 460
Massey JT, see Georgopoulos AP 315
Matsukado Y, see Goto S, et al. 645
Maunsell JHR, see Haenny PE, et al. 245
McElligott JG, Freedman W: Vestibulo-ocular reflex adaptation in cats before and after depletion of norepinephrine . 509
Melvill Jones G, Guitton D, Berthoz A: Changing patterns of eye-head coordination during 6 h of optically reversed vision 531
Meredith M, see Licht G 7
Métin C, Godement P, Imbert M: The primary visual cortex in the mouse: receptive field properties and functional organization 594
Meyer T, see Bindman LJ, et al. 489
Mihara Y, see Goto S, et al. 645
Miyamoto E, see Goto S, et al. 645
Mokha SS, Iggo A: Mechanisms mediating the brain stem control of somatosensory transmission in the dorsal horn of the cat's spinal cord: an intracellular analysis 93
Molinari HH, Dostrovsky JO: Functional properties of neurons in the cat gracile nucleus that project to the dorsal accessory olive 119
Montaron MF, Buser P: Relationships between nucleus medialis dorsalis, pericruciate cortex, ventral tegmental area and nucleus accumbens in cat: an electrophysiological study 559
Morel A, Rouiller E, Ribaupierre Y de, Ribaupierre F de: Tonotopic organization in the medial geniculate body (MGB) of lightly anesthetized cats 24
Nakagawa S, Hasegawa Y, Tokushige A, Kubozono T, Nakano K: Retinal projection to the formatio reticularis tegmenti mesencephali in the Old World monkeys 373
Nakano K, see Nakagawa S, et al. 373
Nambu A, see Jinnai K, et al. 67
Nardone A, Schieppati M: Postural adjustments associated with voluntary contraction of leg muscles in standing man 469
Nedergaard S, Hopkins C, Greenfield SA: Do nigro-striatal neurones possess a discrete dendritic modulatory mechanism? Electrophysiological evidence from the actions of amphetamine in brain slices 444
Nelson PG, see Forsythe ID 272
Nieoullon A, see Kerkerian L 424
Olson L, see Eriksdotter-Nilsson M, et al. 155
Ottersen OP: Postembedding light- and electron microscopic immunocytochemistry of amino acids: description of a new model system allowing identical conditions for specificity testing and tissue processing 167
Pallage V, see Dalrymple-Alford JC, et al. 545
Pamel G, see Bromberg MB, et al. 53
Parvizi N, see Pittius CW, et al. 208
Pasik P, Pasik T, Holstein GR: Serotonin-immunoreactivity in the monkey lateral geniculate nucleus 662
Pasik T, see Pasik P, et al. 662
Penney JB, see Bromberg MB, et al. 53
Perlmutter SI, see Baker JF, et al. 220

Peterson BW, see Baker JF, et al. 220
Pfaff DW, see Chung SK, et al. 522
Pfaltz CR, see Keshner EA, et al. 77
